QUALITY AND PERFORMANCE THAT'S AFFORDABLE!

Branick has been making spreaders for almost 80 years. We have channeled all that experience into our line of small spreaders. You're sure to find the right fit for your shop with features like sawtooth or spring set adjustment, zinc plated rollers, air powered or gas spring assisted spread arms, and an RMA compliant gooseneck light. From the entry model 5035 to the heavier 5120, all are designed to handle any passenger and light truck tire up to 20". The 5120 can even take 22.5" tires. All include a solid 4 point base that can be bolted to the floor for added stability If you're thinking of adding a spreader, think Branick. Manufactured at Branick's facility in Fargo, ND means you get American made quality and toughness.

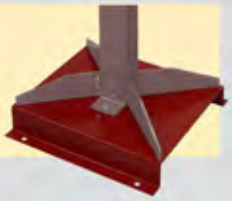
Optional Storage Cabinet (available on 5035 & 5045)

Keep your repair and inspection tools where you need them, at the spreader. Our optional storage cabinet attaches directly to either side of the spreader so you won't waste time searching for supplies. Steel construction to take the punishment of a shop environment.

Optional Riser Platform (available on 5035 & 5045)


If you need a little extra height for an ergonomic position, the optional riser platform will do the trick. The platform's 3" lift brings the working surface to 39.25". Bolts directly to the base of the spreader and includes pre-drilled holes for floor mounting.
