

# TIRE INFLATOR DIGITAL AIRHEAD

# Branick®

## Premium electronic tire inflation!

The Digital Airhead is a sophisticated handheld electronic tire inflator. With leading electronics and sensor technology, it offers fast, accurate, trouble-free inflation and deflation. The Digital AirHead was developed with rugged engineering plastics to meet the exacting specifications of high volume and intensive applications. The light weight and clever design improves the product's ability to withstand shock, further increasing operating life. It has an ergonomic handle and has an easy-to-read display. The Digital AirHead also allows you to inflate and deflate without removing the inflator from the valve stem. Accuracy and speed are further enhanced by the advanced software, while the clear digital display reduces the risk of human errors. The Digital AirHead is calibrated to two tenths psi.

### FEATURES

Leading electronics and sensor technology.....  
Rugged engineering plastics.....  
Light weight and clever design.....  
Ergonomic handle and direct valve.....  
Robust ceramic sensor.....  
Advanced software and clear digital display....

### BENEFITS

Offering fast, accurate, trouble-free inflation and deflation  
Meets the exacting specifications of high volume and intensive applications  
Improves product's ability to withstand shock, further increasing operating life  
Provides comfort and excellent rates of inflation and deflation  
Allows precise measurement with tolerances well above the industry standards  
Accuracy and speed are enhanced and reduces the risk of human error
