(Part# AX-W115)

*Two Warranty Kits required on duplex units

Commercial/Industrial Use

This duplex unit features an electronic control panel that uniquely balances run time equally between each pump, and ensures that neither pump is overworked from irregular air usage. It is well suited for applications with irregular air demands between 50 and 100CFM.

15 HP Three Phase 230v/460v Motor

- Heavy Duty Motor
- Pre-wired Magnetic Starter

Large Displacement 3 Cylinder Pumps

- Only 769 RPM
- 100 CFM @175 PSI each
- Over 8 1/2' of Finned Intercooling for improved efficiency
- Solid Cast Iron Cylinders and Crankcase
- Rod Inserts and Ball Bearing Mains

Electronic Control Panel

- Balances run time equally between pumps

240 Gallon Horizontal Tank

- ASME Certified

Fully Packaged, Fully Set!

Make sure your C-Aire compressor is set up correctly from the start! C-Aire's Fully Packaged Compressors include a factory installed Belt Guard Mounted Aftercooler and Moisture Minder Auto Tank Drain. This is the most affordable way to significantly reduce moisture and prolong the life and effectiveness of your pneumatic tools by removing approximately 60% of the moisture in your compressed air. Fully Packaged units also include an Installation Kit.

AFTERCOOLER

The Aftercooler is mounted directly to the unit's Belt Guard and utilizes the air drawn in by the flywheel for cooling before the air reaches the tank.

AUTOMATIC TANK DRAIN

The Automatic Tank Drain operates each time the compressor cycles, stores condensation without wasting air, prevents valves from fouling and reduces corrosion.

INSTALLATION KIT

4 Mounting Pads
4 Anchor Bolts
Steel Braided Flex Hose
