Commercial/Industrial Use

This model is designed for performance and long life. It features a high performance 3 cylinder cast iron pump with over 8 ½' of finned inter-stage tubing for extra cooling and efficiency. This unit is available in three phase only. See the back page for details about the fully packaged option.

10 HP 3 Phase 230/460v Motor

- Heavy Duty Motor
- Pre-wired Magnetic Starter

Large Displacement 3 Cylinder Pump

- Only 839 RPM
- 38.2 CFM @175 PSI
- Over 8 1/2' of Finned Intercooling for improved efficiency
- Solid Cast Iron Cylinders and Crankcase
- Rod Inserts and Ball Bearing Mains

120 Gallon Horizontal Tank

- ASME Certified
- Also available on 120 gallon vertical tank

Don't Forget an Installation Kit!

- INSTALL-120H
- Steel Braided Flex Hose
- 4 Mounting Pads
- 4 Anchor Bolts

Fully Packaged, Fully Set!

Make sure your C-Aire compressor is set up correctly from the start! C-Aire's Fully Packaged Compressors include a factory installed Belt Guard Mounted Aftercooler and Moisture Minder Auto Tank Drain. This is the most affordable way to significantly reduce moisture and prolong the life and effectiveness of your pneumatic tools by removing approximately 60% of the moisture in your compressed air. Fully Packaged units also include an Installation Kit.

AFTERCOOLER

The Aftercooler is mounted directly to the unit's Belt Guard and utilizes the air drawn in by the flywheel for cooling before the air reaches the tank.

AUTOMATIC TANK DRAIN

The Automatic Tank Drain operates each time the compressor cycles, stores condensation without wasting air, prevents valves from fouling and reduces corrosion.
